

Web Scraping Software Comparison

When the time comes to choose the right scraper, you should base your decision based on your project criteria, and not based on a generic benchmark. These criteria are primarily defined by your team skills, exiting infrastructure, and by your choice of externalizing or keeping everything in-house.

We listed below our ten selections criteria in a ready-to-fill table. You can compare up to three technology or software.

You can refer to [our article for more details on each criterion.](#)
